

KARTHIKEYAN P

Software Developer

- B.Tech (2025) graduate in Artificial Intelligence and Data Science with strong skills in Python, HTML, and software development. Experienced in machine learning fundamentals, data visualization, and prompt engineering for AI applications. Familiar with cloud services and deploying scalable solutions. Proficient in Figma for UI/UX design, with a focus on building efficient, user-centric, and data-driven applications.

Internships

Web Development Intern at trios Technologies

03 July 2023 – 03 Aug 2023

- Developed and maintained responsive web pages using HTML and CSS, improving user interface consistency,
- Collaborated with the development team to design and implement frontend features based on project requirements
- Assisted in debugging and resolving UI issues, enhancing website performance and usability
- Participated in integrating frontend components with backend services
- Followed best practices for clean code, version control, and testing during development

Skills: HTML, CSS, Responsive Web Design, Git, Debugging, UI Optimization, Frontend Development

Education

B. Tech Artificial Intelligence and Data Science

Panimalar Institute of Technology, Chennai

14 November 2021 – 01 June 2025

GPA: 8.14

Courses & Certifications

Network Essentials, Cisco

03 June 2024

Artificial Intelligence Fundamentals, IBM Skillbuild

29 March 2024

Cyber Security Fundamentals, IBM Skillbuild

16 November 2023

Cyber Security, Coincent

06 October 2022

Cloud Complition, IBM Skillbuild

17 September 2022

Mongodb Node.Js Developer Path For SmartBridge , MongoDB.inc

09 September 2024

Projects and Achievements

Real-Time Weather Forecasting app

Apr 2024

Developed a dynamic weather forecasting application using API-based real-time data retrieval. Designed an intuitive user interface for displaying live weather conditions and forecasts.

Stolen Vehicle Detection using YOLO

June 2025

Presented a research paper titled "Enhancing Transparency and Built a computer vision system to detect and track vehicles using YOLO and OpenCV. Integrated license plate recognition using EasyOCR/Tesseract. Implemented database matching to identify stolen vehicles in real time. Developed alert generation and image logging for evidence tracking.
